AI Systems Builder | Building AI systems for Healthcare and
Education | RAG Pipelines • Agentic AI • MCP • Backend
Engineering • SQL • Data Scraping • Finetuning LLMs
Prayagraj, Uttar Pradesh, India

Summary

I'm an `AI Systems Builder` focused on `Building AI systems for Healthcare and Education`. I build `RAG Pipelines • Agentic AI • MCP • Backend Engineering • SQL • Data Scraping • Finetuning LLMs` that solve real-world problems. My journey started in the medical exam ecosystem. While preparing for exams, I discovered ChatGPT and was blown away by its potential to transform how we learn and solve problems. That experience inspired me to pursue AI. At my core, I'm a `Backend Engineer`. I use AI as a component to solve real-world problems and build useful systems. Currently, I'm interested in `Healthcare and Education`, `Agentic AI`, `LLMs`, and `Backend Engineering`. I enjoy learning new technologies, experimenting with them, and turning ideas into `production-ready systems`. My goal is simple: `Build AI systems that improve learning and healthcare` in Healthcare and Education. If you're building something meaningful in this space, ' `Let's connect` '.

Experience

NeuralArun

AI Systems Builder
August 2025 - Present (1 year 1 month)

Freelance AI Systems Engineer Self-Employed | 2024 – Present |
Prayagraj, India

July 2025 - Present (1 year 2 months)

Prayagraj

Building production AI systems for clients in healthcare,
legal, and education domains.

Selected work:

- Legal RAG System — domain-aware retrieval pipeline for
Indian legislative documents with citation-grounded responses

- ArunCore AI Digital Twin — production RAG assistant with
hybrid retrieval, lead capture, and conversational memory

- Real Estate Scraper Suite — async browser and HTTP extraction

system for Cloudflare-protected workflows (99acres)

- Personal AI Agent — FastAPI-based conversational agent with tool-calling, memory, and model fallback handling

Stack: Python · FastAPI · LangChain · LangGraph · ChromaDB · Pinecone · Playwright · Render · HuggingFace Spaces
